Are high-energy songs long and wild — or short and striking?

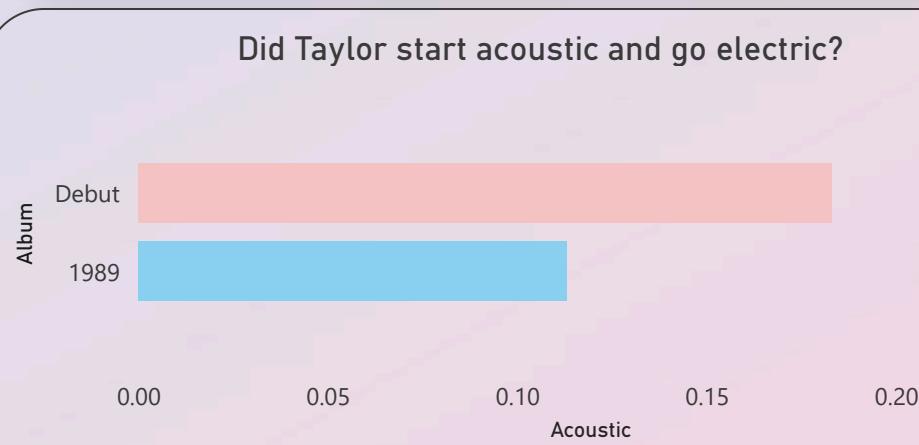

Taylor's high-energy hits are short and punchy, while low-energy tracks tend to flow longer.

Are fast songs always happy, or does Taylor sneak in sadness?

Nope — even fast tracks carry low valence; upbeat tempo ≠ upbeat mood.

Did Taylor start acoustic and go electric?

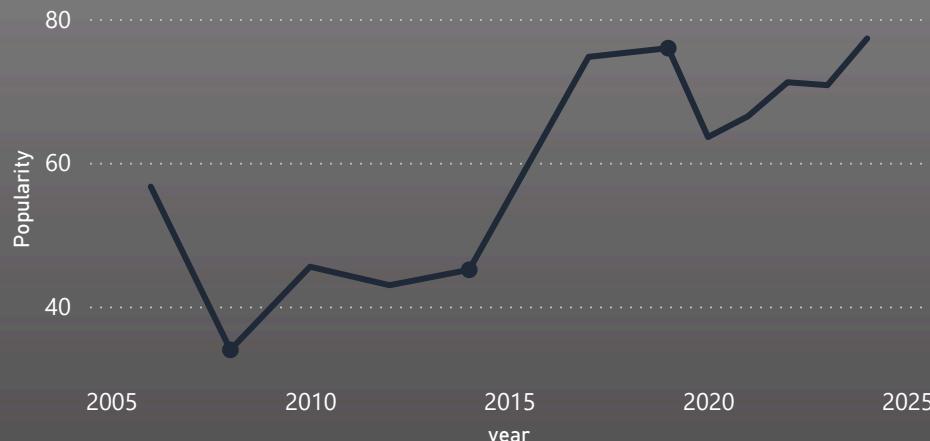

Yes! Her debut is twice as acoustic as 1989.

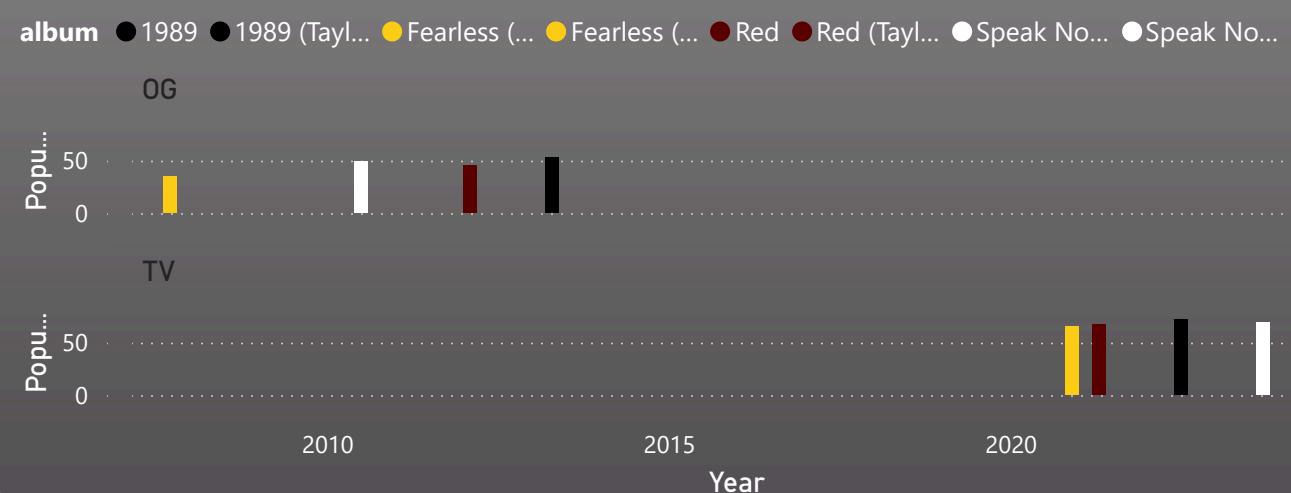

Lover

Has Taylor's music gained momentum over time?

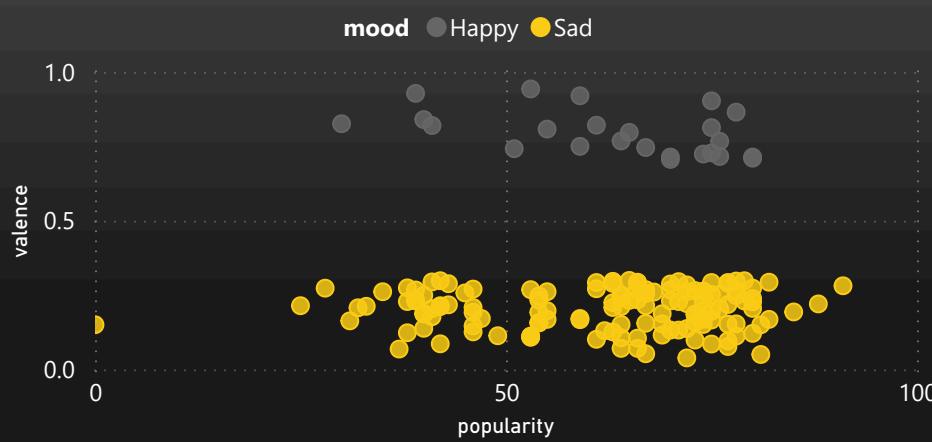

Did Taylor's Versions outperform the originals?

Yes — her popularity trend shows a strong rise post-2014, peaking during lover era.

Taylor's Versions generally maintain or surpass original popularity despite the gap in years.

Are sad songs secretly fan favorites?

reputation

Sad songs dominate high popularity zones, proving emotional resonance matters more than mood.
